Journal of Fluid Mechanics Volume 503 **25 March 2004**

R. Repetto, I. Ghigo, G. Seminara & C. Ciurlo	A simple hydro-elastic model of the dynamics of a vitreous membrane	1
H. Atik, C.Y. Kim & J. D. A. Walker	Three-dimensional separation induced by a convected disturbance	15
H.-D. Xi, S. Lam & K.-Q. Xia	From laminar plumes to organized flows: the onset of large-scale circulation in turbulent thermal convection	47
S. D. Peterson & M. W. Plesniak	Evolution of jets emanating from short holes into crossflow	57
P. K. Yeung & M. S. Borgas	Relative dispersion in isotropic turbulence. Part 1. Direct numerical simulations and Reynolds-number dependence	93
M. S. Borgas & P. K. Yeung	Relative dispersion in isotropic turbulence. Part 2. A new stochastic model with Reynolds-number dependence	125
B. Galletti, C. H. Bruneau, L. Zannetti & A. Iollo	Low-order modelling of laminar flow regimes past a confined square cylinder	161
A. Alexakis, Y.-N. Young R. Rosner	Weakly nonlinear analysis of wind-driven gravity waves	171
R. Balakrishnan	An approach to entropy consistency in second-order hydrodynamic equations	201
T. S. Morton	The velocity field within a vortex ring with a large elliptical cross-section	247
P. Stansell, J. Wolfram & B. Linfoot	Improved joint probability distribution for ocean wave heights and periods	273
L. P. Thomas, B. M. Marino & P. F. Linden	Lock-release inertial gravity currents over a thick porous layer	299
T. E. Baldock, T. J. O'Hare & D. A. Huntley	Long wave forcing on barred beach	321
A. Ferrante & S. Elghobashi	On the physical mechanisms of drag reduction in a spatially developing turbulent boundary layer laden with microbubbles	345
N. Schorghofer, B. Jensen, A. Kudrolli & D. H. Rothman	Spontaneous channelization in permeable ground: theory, experiment, and observation	357
